Capabilities Statement

Onix Consulting Partners

Strategy Execution & AI Enablement Specialists

Onix Consulting Partners

Your Idea. Our Strategy.

CORE COMPETENCIES

Onix Consulting Partners helps small to mid-sized businesses, municipalities, and women-led organizations turn strategy into structured execution systems that drive measurable results.

We specialize in:

- Strategic planning & roadmapping tailored to the specific skillsets of your team
- Execution system design & implementation based on your teams capabilities and bandwidth
- Develop team training, alignment & accountability structures designed to improve efficiency
- Operational process auditing and recommended improvement opportunities
- AI Integration training for safe business operations (planning, tracking, reporting, communication)
- Cross-Functional PMO development & Program Oversight Guidance

Most Recent Project Performance

- Led multi-million dollar utility projects by establishing core PMO infrastructure, including centralized command centers, enabling consistent execution and visibility, from operations to senior leadership.
- Targeted alignment of operational & technical teams to maintain project throughput, systemize workflows, and reduce execution gaps.
- Conducted comprehensive assessments of field support operations covering all jurisdictions to deliver actionable insights to improve system performance & operational efficiency.

Key Services

SMART Goal Setting

- Facilitate structured goal setting sessions that help teams get aligned on clear, outcome-driven goals.

Strategic Execution System Build

- Develop structured systems that enable consistent execution and scalable growth.

Strategic Clarity & AI Alignment Session

- Identify priorities, uncover operational gaps, and determine where AI can improve operational efficiencies and improve decision-making.

Fractional Strategy & Execution Partner

- Provide ongoing strategic oversight, execution support, and operational optimization for growing organizations.

Differentiators

- 20+ years of senior-level corporate experience in building PMO teams.
- Background in complex, regulated environments (including utilities and construction).
- Ability to bridge strategy and execution using AI for optimal operationalizing.
- Security-focused AI integration for compliance and continuous operational improvement.
- Proven ability to align teams, reduce inefficiencies, and drive consistent execution.
